

## Bi-County Ambulance Receives DRA/Mystique Grant and Acquires CAS Vital Sign Monitors

With the assistance of a grant in the amount of \$5,000 through Mystique Casino and DRA, Bi-County Ambulance acquired 2 CAS Vital Signs Monitors. Two CAS Monitors were recently purchased and members trained on the use of the devices. The CAS monitors are able to accurately collect patient physiologic measurements in a timely manner. The monitors are able to capture automatic non-invasive blood pressure measurements, support continuous SpO2 and pulse rate monitoring with high and low alarms and patient temperature. The repeated and continuous monitoring and measurements of a patient's physiological function guides patient management and treatment modalities. This technology better equips the patient care provider to make therapeutic decisions in the treatments and interventions provided. Bi-County Ambulance volunteers are pleased to be able to implement this advanced monitoring technology to the patients and community they serve.
